DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 7 and 9 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Baeten et al. USPN 5,425,751 (alone or in view of Duysens et al. USPN 6,360,130).

Baeten teaches and electrode lead 44 and a non rigid tether in the form of a suture with an anchoring coil 34 thereon. Applicant's statement of intended use regarding the anchor surface provides no identifying structure since the coil portion could be grabbed by forceps and pushed into tissue. The coil member and suture are made of bioabsorbable material (column 3 lines 48+). The examiner considers the

Art Unit: 3766

needle suture and coil to be the anchor distal end. Alternatively, to have cut the suture off at the anchoring coil as in Duysens figures 15-17 to result in the claimed invention would have been obvious.

Claims 1, 7, 10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Malonek et al. USPN 6,292,704 (alone or in view of Duysens et al. USPN 6,360,130).

Malonek et al teach an electrode member 32 and tines 18 extending from a tether. The examiner applies the same interpretation to Malonek et al as above to Baeten in considering the needle suture and tines to form the distal end anchor or obvious to remove the suture and needle proximal the tines as in Duysens et al.

Claims 4-5, 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baeten et al. USPN 5,425,751 (alone or in view of Duysens et al. USPN 6,360,130) or Malonek et al. USPN 6,292,704 (alone or in view of Duysens et al. USPN 6,360,13). Applicant differs in reciting conventional materials for the suture member. In addition, to have placed a notch (recess) in either of the anchors would not constitutes an unobvious difference.

Response to Arguments

Applicant's arguments with respect to claims 1, 4-5, 7-10 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 15, 18-25, 27-29 are allowed.

Claims 2-3, 6, 11-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
